DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Germany on 1/21/2004. It is noted, however, that applicant has not filed a certified copy of the 10 2004 003 280.7 application as required by 35 U.S.C. 119(b).

Specification

2. The disclosure is objected to because of the following informalities: The word "centre" appearing throughout the specification (ie paragraphs [0003] and [0024] should be replaced with the accepted US spelling "center".

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 7-12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by DE9203873 herein referred to as '873.

5. For Claims 7-12, '873 teaches a door closer comprising: a housing for receiving a door closing mechanism, the housing comprising two attaching flanges (Fig. 1: 20), each of the attaching flanges having three attachment holes for receiving attachment components; wherein the housing has two end surfaces, and the attaching flanges are

disposed at the end surfaces, respectively; wherein the attachment holes of each of the attaching flanges are equally spaced from one another; wherein the attachment holes of each of the attaching flanges are aligned with each other; wherein the housing has a longitudinal central plane, and the central attachment hole of each of the attaching flanges is disposed in the longitudinal central plane; wherein the remaining two attachment holes of each of the attaching flanges are offset from the longitudinal central plane (as is clearly seen in Figures 1 and 2).
